

Jungle Disk Press Kit

The Jungle Disk Story

Every small business has critical information they need to keep safe. Modern businesses face a unique challenge when it comes to protecting this data, one that changes rapidly in the technology-focused time we live in. Backups fail. Local disks fail. Files corrupt. Hackers prey. Jungle Disk was founded because we care about your business, we want you to succeed, and we know that having a solid security foundation is invaluable to your success.

To battle these daily threats, we use the most advanced technology available. When we began in 2006, we created one of the first products to leverage Amazon's new S3 storage - allowing users to access enterprise-level cloud technology and power, without being an expert software developer. We maintain that relationship with Amazon's cloud storage service, as well as now having added support for Rackspace's powerful cloud platform.

Our team of entrepreneurs and security experts moved to San Antonio, Texas in 2010, where we call home today as we continue to grow our company. We now serve over 25,000 customers all over the world and have data centers in both the United States and Europe. Even with this growth, Jungle Disk remains as dedicated as ever to protecting your data at an affordable cost to you, all while providing incredible customer service and support, as one small business to the next. We're also active in our San Antonio Community supporting entrepreneurship and education.

Why Jungle Disk?

Headquartered in Cyber City USA, San Antonio, TX

#1 data security suite for businesses with 2-250 employees

- Data security suite includes: Encrypted Cloud Backup for Computers and Servers, Encrypted Cloud Backup for Quickbooks Online, Managed Microsoft Office 365 or Google G Suite with Email Archiving, Network Protection and Password Management with TeamPassword
- Turn-key assistance with HIPAA, FINRA / SEC, PCI, & other regulatory compliance
- Over 10 billion successful backups and restores of critical business data annually

Consistent tech leadership for over decade

- 1st data security suite available entirely as a monthly subscription service
- 1st cloud based data backup and file storage to support Amazon Web Services S3 & Rackspace Cloud Files

Secure audited software and data centers (in the United States & Europe)

- SSAE16 Type II (formerly SAS70), SOC1, SOC2 (Security & Availability), SOC3, Payment Card Industry (PCI) Level 1 Service Provider, & ISO 27001:2005
- Application security, including client software and platform services, audit by Denim Group

Jungle Disk Customers

Over 25,000 customers trust Jungle Disk to keep their business safe.

Customers include SA Youth, Lucsroofing.com, Pilgrims Capital Advisors, de la Riva & Associates, Maloney Law Group, P.L.L.C, AFI Insurance, Prepared Insurance Company and Innovative Biopharma, L.L.C.

Hear from the CEO of SA Youth:

"One Jungle Disk user is Asia Ciaravino, CEO of San Antonio Youth, which helps low-income children stay in school and dropouts get a second chance through high school credit programs.

When Ciaravino took over the organization, the nonprofit had spotty data systems with information getting lost. Now everything is backed up regularly and the organization receives an email if there's been a breach.

"The services we provide in San Antonio are so important to young people that without having secure data, we couldn't survive," she said. "I don't even have to think about cybersecurity anymore."
